

AXIS T97A10 Enclosure

IP66-rated wall-mount enclosure

- > Outdoor ready
- > Easy to install
- > Wall mount

AXIS T97A10 is a protective enclosure that allows Axis video network products to be installed outdoors and protected against the weather.

AXIS T97A10 is IP66-rated, and allows the protected unit to operate in a temperature range of 0 °C to 45 °C (32 °F to 113 °F).

The network video unit is easily mounted inside the enclosure with two screws. Fastening the top cover secures and guarantees the installation.

The enclosure is designed for wall mounting, and for vandal-resistant protection, a metal wall mount box can

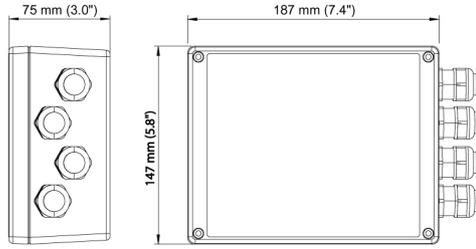

be used. AXIS T97A10 can also be installed on a pole, using the wall mount box together with a pole mount plate.

Supported Axis video products: AXIS Q7401 Video Encoder and AXIS P8221 Network I/O Audio Module.

Technical Specifications - AXIS T97A10 Enclosure
