KCP4000 Proximity Keyfob

SIDE

Dimensions code: 52mmL x 34mmW x 5mmD

Each KCP4000 proximity keyfob is engraved with its unique 10 digit ID number.

RESIDENTS

Use your proximity key to enter through those doors authorised to you. Simply hold the proximity key in front of the proximity reader in the door panel. The LED will illuminate green to indicate that the proximity key is OK and the door will unlock.

Please keep a record of the unique 10 digit number engraved on each proximity key issued to you.

KCP4000 proximity keys are always part of a unique group of keys which we refer to as a "Site Code".

Each proximity key starts with the same first 5no digits (the site code) followed by the user identification number 00001, 00002, 00003 and so on. This enables individual and batch programming and deletion. Most importantly, it means there is an exact record of proximity key numbers provided, for example: 01970 00001 – 01970 00150. Subsequent orders will continue the sequence 01970 00151 etc.

Concierge/Management company: Please order spares on a site code basis.
